S.I. No.: **05-4**Page: **1 of 3**Issued: **04/04/05**Revised: **10/13/14**Revision: **1**

Title: **CONTINUING AIRWORTHINESS OF LYCOMING OIL PUMP HOUSINGS**

Technical Portions are FAA DER Approved.

1.0 PURPOSE: This service instruction provides the continuing airworthiness for ECI oil pump housings installed on Lycoming series engines.

2.0 MODELS AFFECTED: All Lycoming models listed in section 4.0 Installation Eligibility.

3.0 TIME OF COMPLIANCE: Whenever ECI oil pump housings are installed in a certificated Lycoming engine.

4.0 INSTALLATION ELIGIBILITY:

5.0 APPROVED CONVERSIONS OF OIL PUMP HOUSINGS:

The AEL78528 oil pump housing, which is eligible for most 4-cylinder applications, except 235 and 290 series engines, may be converted to an equivalent oil pump housing to AEL78531 by threading and plugging the oil passage that would normally supply oil to the AN-style fuel pump gear train. The conversion, once accomplished, effectively changes the eligibility of AEL78528 to that of AEL78531 and changes the oil pump housing designation to AEL78531-1. Furthermore, this allows the user to convert from the AEL78531-1 to the AEL78528 housing by removing the set screw plug.

ECi has developed a procedure to convert the AEL78528 housing to the AEL78531-1, which is equivalent to AEL78531. This procedure has been FAA-DER approved and is detailed below. Figure 1 below shows this assembly.

1. Drill and tap \varnothing .188 hole to 1/4-20UNC-3B thread to depth 0.750 ± 0.010 inch.
2. Install set screw (AE64990-1 or other approved equivalent) using Loctite 271 (or equivalent) to 0.010 inch minimum below surface. Torque to 76–96 in-lbs.
3. Pressure test assembly with 100 psi air to ensure oil-tight seal.

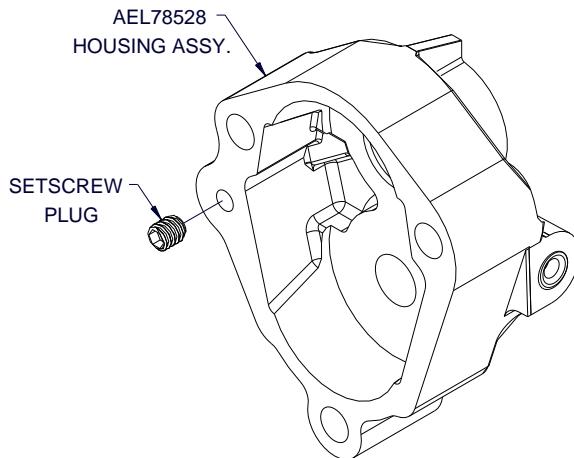

Figure 1: AEL78531-1 Assembly

For more information about this approved conversion, contact ECi at 800-eci2fly or sales-service@eci2fly.com.
